

SUBJECT: GENERAL CORPORATE PROFILE

Over the years, **ENERBUILDING s.r.l. group** has acquired a deep technical-production as well as organizational experience in the field of steel construction, asbestos removal service, refurbish of new roofs and public and private building. Being a **Company certified by the most important certification bodies**, through a thirty-year experience in the construction sector, we are now able to meet the most specific needs in terms of :

- **Metal carpentries:** construction and design of **Steel Structure Sheds** for sport, industry and agriculture, construction of **Safety Stairs, Lofts, Hangars** and Space Structures;
- **New Roofing** (new roofs, pre-painted galvanised sheet metal, insulated panels, sound-proof and anti-condensation corrugated sheet metal) **and Asbestos removal** (work plans, ASL permits, plus removal and disposal in authorised landfills);
- Construction and installation of structures for **Solar Power Plants**;
- **Civil and Industrial Building and Ecosustainability Building** for public and private turnkey works.

Our Corporate target is creating the ideal work place, which is ecological and safe; a space that is able to become integrated with man, in order to welcome and protect them. Equipped with a technical staff that is competent, innovative and dynamic, we promote pump priming using production methods which combine the total quality of the services offered with functionality, customized solutions and balanced costs.

ENERBUILDING s.r.l. group has been working for years according to the quality standards: we have been one among the first companies to obtain the management system certification with the now outdated standard UNI EN ISO 9001:1994, to move to **UNI EN ISO 9001:2008** and **UNI EN ISO 3834-2**. We have recently obtained the **UNI EN 1090-1:2012 EXC 2 and EXC 3 in relation to the factory production control according to the system 2+**.

Moreover, we are a **SOA Certified Company**, with certificate of qualification issued by authorized Certification Bodies to execute Public Works in the category: **O.S. 18-A II**.

Among the first ever in Apulia to receive the **top recognition in the sector PROCESSING CENTRES** from the Central Technical Service as a **PRODUCTION WORKSHOP OF METAL CARPENTRIES** in compliance with the Ministerial Decree DM 17.01.2018.

ENERBUILDING s.r.l. group provides support services such as feasibility studies and preliminary projects according to customized needs, executive design of construction and assembly drawings, coordination of the metal structure with technological details and plants, manufacturing and testing in the workshop, protective treatments of galvanizing materials, sandblasting, painting or fire resistance treatments, installation, transport, assembly, final testing and certifications for company quality systems.

Everyday **ENERBUILDING s.r.l. group** is dedicated to the research of innovative and cutting-edge materials for the construction of new roofs, walls, REI panels, finishing sheet metal, sheet metal for collecting rainwater. In particular, it uses pre-painted galvanized sheet metal, insulated panels, corrugated and sound-proof and anti-condensation sheets, managing to combine aesthetics with the cost-effectiveness of the work created.

In every work project we highlight the relationship that links man to the land through constant monitoring of what are the market needs. Commitment, experience, passion and professionalism at the service of our client.

We would like to thank you for your attention and look forward to hearing from you,
Best regards.

ENERBUILDING s.r.l.

ASBESTOS DIVISION and NEW ROOFING

The company deals with the remediation and removal of asbestos roofing, flues, expansion vessels, tanks, tiles and fragments scattered on public and private land. The remediation works of asbestos cement sheets are carried out in compliance with the current regulations on asbestos disposal (Legislative Decree 257/06, Ministerial Decree 475/92, Legislative Decree 195/06, Legislative Decree 81/08, Ministerial Decree on Health 14/05/96 and Ministerial Decree on Health 99). We would like to point out the following main phases, in particular:

1. Drafting and submitting a safety plan for asbestos remediation work to the ASL offices responsible for the area to get the plan approved and a permit issued;
2. Certification of workers suitability;
3. Setting up a work area on site with demarcation barriers and appropriate signs to prevent access by personnel not authorised by the ASL; installation of decontamination areas on-site and creation of a delimited area for waste storage;
4. Classification analysis of materials to be removed;
5. Application of a coloured fixative and encapsulating product to prevent the release of fibres during the removal phases;
6. Remediation of fibre cement sheets;
7. Lowering of the material to the ground, packaging, sealing and labelling of waste;
8. Final environmental monitoring to assess the release of asbestos fibres into the environment;
9. Transport and disposal of special waste consisting of asbestos cement sheets.

In order to operate in the remediation sector, the company has acquired registration in the ENVIRONMENTAL MANAGEMENT REGISTER for waste management for categories 10 A class D.

DIVISION: METAL CARPENTRIES / BUILDING

The company is founded on the experience acquired and consolidated in the metal construction sector in the industrial, civil and public sectors; in the construction of load-bearing structures, in the reinforcement and restoration of historic buildings; in the construction of sports facilities, industrial and agricultural factories, hangars, tunnels, emergency stairs and structures for photovoltaic systems.

We provide customized solutions for all types of steel constructions: small and large span metal structures with single pitch, double pitch, shed or curved; lattice or solid beams as well as spatial structures.

The multiple use of steel and its alloys adapts perfectly to modern architectural needs and can significantly improve people's safety and quality of life. Furthermore, steel allows us to combine the increasingly requested creative freedom with construction efficiency, and more. *"Sustainability means definitively re-establishing the balance between the conservation of natural resources, favourable economic conditions and a better quality of life for all human beings"*

A story told by metal carpentry constructions carried out in Italy and throughout Europe. We believe that the decisive factors of this continuous growth have been founded not only on the use of high-quality raw materials, on the professionalism of the technicians and on punctuality in deliveries, but above all on our "ecological" work philosophy. For us, ecology is a high value, which allows for an integration, not only physical, but also and above all spiritual of the environment of which we are part. In this perspective, perhaps the most effective action we have been able to carry out over the years has been to spread our ideas through constructions and all our work.

OUR CERTIFICATIONS

PROCESSING CENTRE ACTIVITY REPORTING CERTIFICATE

N. 3104/14

In compliance with Ministerial Decree dated 14th January 2008 "Technical Standards for Buildings" it is hereby certified that

ENERBUILDING Srl

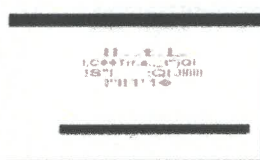

for its own plant located at:

S.P. Andria-Trani Km 1,500 – 76123 – ANDRIA (BT)

has filed with the Central Technical Service the documentation of the requirements requested by the standard for the processing of steel related to the :

WORKSHOP FOR THE PRODUCTION OF METAL CARPENTRY

Each package of the processed product can be traced back to the above-mentioned company, with all the information needed to identify the order through the following label:

This reporting certificate has the sole purpose of identifying the Processing Centre. In this sense, the reporting certificate is not intended to certify the actual technical suitability of the processed product for the various uses for which it may be intended and cannot transfer the responsibility of the Processing Centre and of the designer to the Central Technical Service, as each specific application of the product remains responsibility of the aforementioned professionals. This certificate is valid until the initial conditions, which it was issued upon, undergo significant changes.
